

Venue Oaón, rebuilt in Elementor.

Everything the Astro site does, translated into Elementor's own vocabulary: global colours and fonts to paste into Site Settings, every component with its exact spec, and a section-by-section blueprint for all five pages. Build in the order in Part 01 and the result will match the live site at venueoaon.co.za.

TARGET

Elementor Pro, Flexbox containers

FONTS

Tenor Sans · Inter

PART 01

Approach: set the system once, then assemble.

The site's whole look comes from a small set of rules applied with discipline: two typefaces, a warm neutral palette with one brown accent, 2px corners on anything clickable, hairline dividers, and generous vertical rhythm. If those rules live in Elementor's Site Settings before a single page is built, every widget inherits them and the pages come together fast.

The vibe in one sentence: quiet, editorial, warm. Small uppercase labels with wide tracking, big unhurried Tenor Sans headlines, stone-grey body copy, and lots of air. Nothing bounces, glows, or uses a drop shadow bigger than a whisper. When in doubt, remove something.

WordPress + Elementor Pro (needed for Theme Builder header/footer, the Form widget, the Gallery widget with filters, and Popups). Use a blank theme (Hello Elementor). Turn on *Flexbox Container* and *Nested Elements* in Elementor → Settings → Features.

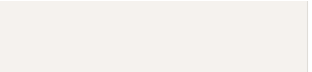

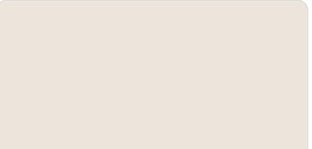

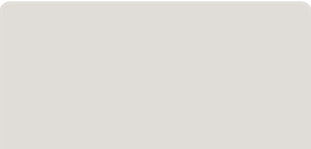

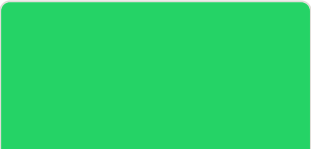

-
- 02 **Site Settings → Global Colors & Fonts**
Enter the palette from Part 02 and the four font roles from Part 03. Disable Elementor's default colours and typography (Settings → General) so nothing inherits the theme's blue.
-
- 03 **Site Settings → Layout, Buttons, Form Fields**
Content width 1240, section padding, button and field defaults from Parts 04–05. Paste the Custom CSS from Part 08 into Site Settings → Custom CSS.
-
- 04 **Theme Builder → Header and Footer**
Build once from Part 06, set display conditions to Entire Site.
-
- 05 **Build the reusable sections as Saved Templates**
Stats strip, Suite card, Package grid, Detail card, Enquiry band, "Come see the space" CTA. Save each as a template so Home, Packages and Contact reuse the same object.
-
- 06 **Assemble the five pages**
Follow the blueprints in Part 07 top to bottom. Every section is a container with the padding from Part 04; alternate white and linen backgrounds exactly as listed.
-
- 07 **Forms, WhatsApp, SEO, launch**
Part 09: wire the enquiry forms to email, add the WhatsApp launcher, set redirects for the old URLs, upload OG image and favicons, install an SEO plugin and add the LocalBusiness schema.
-
-

PART 02

Global colours

Elementor gives you four system slots (Primary, Secondary, Text, Accent) plus unlimited custom colours. Map them as tagged below so widgets pick the right default. Never type hex codes into individual widgets: always pick from Globals so a change propagates.

 Accent #8B6448 Primary buttons, links, icons, featured package, "Enquire" CTA SYSTEM: PRIMARY	 Charcoal #1A1A1A Headings, body on light, stats strip bg, button hover state SYSTEM: SECONDARY	 Stone #8C8578 Muted body copy, labels, nav links, card descriptions SYSTEM: TEXT	 Linen #F5F2EE Alternate section bg, input fills, badges, card hover SYSTEM: ACCENT
 White #FFFFFF Page ground, cards on linen, header bar at 98% CUSTOM	 Stone Text #6B6560 Ghost buttons, form feedback (AA on white) CUSTOM	 Accent Deep #6E4E38 Hover on accent surfaces (featured package, submit on dark) CUSTOM	 Accent Pale #EDE5DC Success message panel, soft callouts CUSTOM
 Accent Muted #B89882 Warm seam line above footer (at 18% opacity) CUSTOM	 Divider #E0DDD8 Every hairline: borders, card edges, list rules, header bottom CUSTOM	 Surface CTA #33281F Enquiry band on Home (warm espresso, sits above footer) CUSTOM	 Surface Footer #121212 Footer only: deepest, coolest surface on the page CUSTOM
 Stone Light #C9C1B5 Muted text on the espresso enquiry band CUSTOM	 WhatsApp #25D366 Floating WhatsApp button only. Never elsewhere. CUSTOM		

Dark surface ladder

The bottom of the home page stacks two dark surfaces and they are deliberately different. The enquiry band is **warm and lighter** (#33281F) so it reads as "act here"; the footer is **neutral and darker** (#121212) so it recedes and ends the page. A 1px seam of Accent Muted at 18% opacity separates them. The stats strip under the hero uses Charcoal (#1A1A1A), a third, cooler dark. Keep all three distinct.

Global fonts & type scale

Two Google Fonts, both already available in Elementor's font picker. Tenor Sans has a single weight (400) and is never bolded. Inter loads at 300, 400 and 500 only. Headings are never bold, never all-caps, never larger than 96px.

ELEMENTOR GLOBAL FONT	FAMILY	WEIGHT	TRANSFORM	LETTER-SPACING	USE
Primary	Tenor Sans	400	None	0.02em	All headings, stat values, card titles, button text
Secondary	Tenor Sans	400	None	0.02em	Intro paragraphs, pull quotes (heading face at body-ish sizes)
Text	Inter	400	None	0	Body copy, form inputs, card descriptions
Accent	Inter	400	Uppercase	0.22em	Eyebrow labels, nav links, badges, table labels, footer column titles

Scale

The live site uses fluid `clamp()` sizes. Elementor can't express clamp in the UI, so use the three breakpoint values below (Desktop / Tablet / Mobile). Line-height 1.1 on all headings, 1.75 on body.

Hero H1

Tenor Sans · 96 / 64 / 40px
line-height 1.1 · max-width 10ch
white on photo, subtle text-shadow

A space made for your moment.

Page H1

Tenor Sans · 96 / 56 / 36px
line-height 1.1 · max-width 14ch ·
Charcoal

Born from a love of hosting.

Section H2

Tenor Sans · 48 / 36 / 32px
line-height 1.1 · always preceded by a
label 16px above

Three spaces. One venue.

Card H3

Tenor Sans · 26 / 22 / 20px
letter-spacing 0.02em

The Myrrh Suite

Intro / quote

Tenor Sans · 24 / 20 / 18px
line-height 1.5 · Charcoal

Built for the small and significant. White-washed walls, warm wooden elements, and private garden spaces.

Body

Inter 400 · 16 / 15 / 14px
line-height 1.75 · Stone (#8C8578) in most places, Charcoal only where it must be read closely

Every detail considered, because when people gather to celebrate someone they love, the space should feel like it was made for them.

Small

Inter 400 · 13px
line-height 1.65 · Stone

Need more room? The Myrrh and Garden suites can be booked together as a combined indoor and outdoor space for up to 50 guests.

Label

Inter 400 · 10px · uppercase
letter-spacing 0.22em · Stone
Buttons use Tenor Sans at the same size with 0.18em

INTIMATE EVENT SPACE

PART 04

Layout & spacing

Enter these in Site Settings → Layout, then set every top-level section container to the section padding. The rhythm is what makes the site feel calm; don't shrink it to fit more above the fold.

SETTING	DESKTOP (≥1025)	TABLET (768–1024)	MOBILE (≤767)	NOTES
---------	-----------------	-------------------	---------------	-------

Content width	1240px	100%	100%	Site Settings → Layout → Content Width. Everything sits in a boxed container.
---------------	--------	------	------	---

SETTING	DESKTOP (≥1025)	TABLET (768–1024)	MOBILE (≤767)	NOTES
Side gutter (container padding L/R)	72px	40px	16px	Live site uses <code>clamp(1rem, 5vw, 4.5rem)</code>
Section padding top / bottom	112px	80px	64px	Every <code>.section</code> . Header and stats strip are exceptions (see below).
Section header → content gap	80px	56px	48px	Space between the label + H2 block and the grid beneath it
Label → H2 gap	16px	16px	16px	Constant
Card grid gap	24px	24px	24px	Suite cards; 16px for detail cards; 1px for package/values grids
Two-column gap (text / list)	96px	56px	48px	The Space, About story, Contact, Enquiry band
Header height	100px	80px	68px	Fixed; every page starts with top padding equal to this
Stats strip padding	32px	32px	32px	Deliberately tight: it's a strip, not a section
Widgets space (default)	20px	20px	16px	Site Settings → Layout → Widgets Space

Radii and lines

- **2px** — buttons, badges, chips, filter buttons, image captions. Anything clickable and small is almost square.
- **6px** — form inputs, feedback panels, code blocks.
- **8px** — detail cards, gallery tiles, glance cards.
- **10px** — suite cards, package grid outer edge, values grid, partner strip, **12px** only on the contact hire strip, story image.
- **Hairlines** — the site draws 0.5px lines in Divider (#E0DDD8). Elementor's minimum is 1px; 1px in the same colour reads fine. On dark surfaces use white at 8–15% opacity.
- **Shadows** —

header on scroll:	<code>0 2px 24px rgba(0,0,0,.06)</code>	. Suite card hover:	<code>0 16px 48px rgba(0,0,0,.08)</code>	with 4px lift. Detail card hover:	<code>0 4px 24px rgba(0,0,0,.05)</code>	. Nothing else has a shadow.
-------------------	---	---------------------	--	-----------------------------------	---	------------------------------

Motion

- **Scroll reveal** — most blocks fade up 22px over 0.7s when they enter the viewport. *Fade In*, *Slow*. Stagger siblings with `d1–d4` classes).

- **Hero entrance** — eyebrow, headline and sub/buttons rise in sequence at 100 / 250 / 400ms. Same Fade In Up with those delays.
- **Hover** — colour changes over 200–220ms; suite card lifts 4px over 300ms; story image scales 1.04 over 600ms. Set Hover Animation to none and use Transition Duration in the widget's hover tab instead.
- **Nothing else moves.** No bounce, no parallax, no zoom-in entrances.

PART 05

Components

Each one rendered live in the real styling, with the Elementor widget to use and the settings that matter. Where the demo is on linen or a dark ground, that's the ground the component lives on in the site.

Buttons

Widget: Button. **Typography:** Tenor Sans 10px, uppercase, letter-spacing 0.18em. **Padding:** 0 32px, min-height 48px (set Padding 14px 32px). **Radius:** 2px. **Transition:** 0.22s. Save each variant as a Global Widget or set it in Site Settings → Buttons and override per instance.

BEGIN THE INQUIRY

ABOUT THE VENUE

EXPLORE THE SUITES

Accent: bg Accent, text White, hover bg Charcoal. **Outline:** transparent, 1px Charcoal border, hover fills Charcoal. **Ghost:** Inter, Stone Text, underline offset 5px in #C8C4BF, hover Charcoal. Ghost lives on light grounds only.

GO TO FULL ENQUIRY FORM

SEND INQUIRY

VIEW PACKAGES

Outline Light: white text, 1px white at 55%, bg white 6%; hover bg white 14%, border 85%. Used on the hero and the enquiry band. **White:** bg White, text Charcoal, hover Linen. Used on the accent-coloured partner strip.

Eyebrow label

Widget: Heading (HTML tag: span) with the Accent global font. Sits 16px above every H2. On the hero, About story, and page heroes it's preceded by a 28–32px × 1px rule in Stone: build as a container with Row direction, gap 14px, and a Divider widget of width 32px.

— THE SPACE

Built for the small and significant.

Badges & chips

Widget: Heading (span) or Button with no link. 10px uppercase Inter, letter-spacing 0.14em, padding 4px 12px, radius 2px. Filter buttons on Gallery: 44px tall, 0 16px padding, letter-spacing 0.16em, active state Charcoal fill.

Standard hire is four hours.

08:00 – 12:00

13:00 – 17:00

18:00 – 22:00

01 Self-Catering Freedom

Self-cater at no additional fee, or order from the on-site restaurant. No corkage.

02 Décor Partnership

Oaón Events handles full décor : balloon arches, florals, backdrops, and table settings.

03 Secured Parking

On-site secured parking for all guests. No street parking stress on the day.

04 Intimate by Design

20–50 guests is a feature, not a limitation. Spacious enough to breathe, small enough to feel.

Form fields

Widget: Elementor Pro Form. Site Settings → Form Fields: bg Linen, 1px Divider border, radius 6px, padding 14px 16px, Inter 15px Charcoal, min-height 48px; focus border Charcoal + bg White. Labels use the Accent global font at 0.2em tracking, 8px above the field. Two-column layout (50% fields) above 680px; message field and submit span full width. On the contact page the form sits inside a linen card, so fields there are White with the Divider border. On the dark enquiry band fields are white 10% with a white 38% border and white text.

ENQUIRE

- **Container:** full width, position Fixed, z-index 200, height 100 / 80 / 68px, bg White at 98%, bottom border 1px Divider, padding 0 gutter. Row, space-between, align center. Add Custom CSS class site-header so the scroll shadow in Part 08 applies.
- **Logo:** Site Logo widget, venue-oaon-logo.png (1285×791), height 80 / 54 / 40px, width auto.
- **Menu:** Nav Menu widget, horizontal, gap 40px. Typography: Accent global font but letter-spacing 0.15em, Stone; hover and active Charcoal. Pointer: *Underline* , *Fade* , 1px Charcoal. Breakpoint for hamburger: 900px (set custom breakpoint "Laptop" or use Tablet at 1024 as nearest).

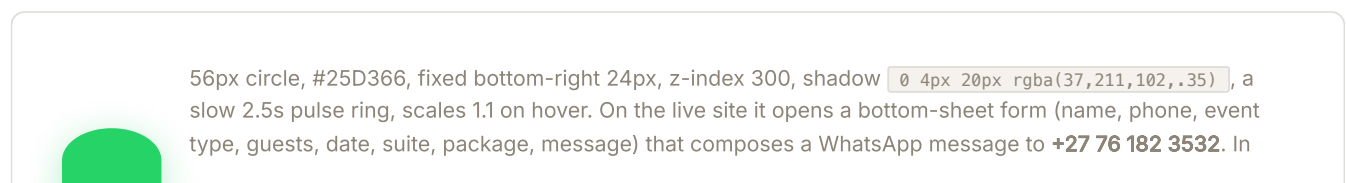

- **CTA:** Button "Enquire" → /contact. Tenor Sans 10px, 0.16em, bg Accent, hover Charcoal, 44px tall, padding 0 22px, radius 2px. Mobile: 38px, padding 0 14px.
- **Mobile menu:** Nav Menu dropdown layout, full-width, items 52px tall with 1px Divider rules, hover bg Linen. Three-line hamburger with 0.5px-thin bars (1px in Elementor), 20px wide. Final item "Begin the Inquiry →" in Accent, Tenor Sans.

Footer

- **Container:** bg Surface Footer (#121212), top border 1px Accent Muted at 18%, padding 96 / 80 / 64px top, 32px bottom.
- **Grid:** three columns 2fr 1fr 1fr, gap 80px (stack at tablet with 40px gap). Column 1: logo (Site Logo, 64px tall, CSS filter `brightness(0) invert(1)`, opacity 0.92) + tagline 13px Stone, max-width 280px. Columns 2–3: label (Accent font, 0.2em, Stone, 20px below) + Icon List with no icons, 13px, white 65%, hover white, 44px min-height per item.
- **Bottom bar:** 1px white 8% top border, 24px padding-top, Row space-between, 13px Stone. Partner link white 78% underlined.
- **Links:** Find Us → Google Maps (978 Veda Ave, Montana AH, Pretoria, 0186). Events Partner → <https://oaonevents.co.za/>. Email → <mailto:info@venueoaon.co.za>.

Floating WhatsApp launcher

Elementor: a Button with the class `wa-float` triggering a Popup (Theme Builder → Popups, slide-up from bottom, radius 20px top corners, max-height 92vh) containing a Form whose action is "Redirect" to `https://wa.me/27761823532?text=[form fields]`. Or use a WhatsApp plugin (e.g. Click to Chat) and restyle it to these values.

PART 07

Page blueprints

Each page as a stack of sections, top to bottom. The colour strip shows the section background. Every section without a stated padding uses the standard section padding from Part 04. The four sub-pages all open with the same Page Hero: pale gradient, eyebrow, big H1, bottom-aligned, min-height 42vh.

Home /

Title: *Venue Oaón / Intimate Event Space in Montana, Pretoria*. The only page with a photo hero and the dark enquiry band. Seven sections, alternating white / linen after the stats strip.

Page hero PALE GRADIENT	BUILD Page Hero template. COPY DÉCOR & PACKAGES Décor done for you.
Intro + hire strip WHITE	BUILD Intro block max-width 640px: label (with inline Accent link), Tenor Sans 24px title, 16px Stone body. Then 80px below, the hire strip: container bg Charcoal, radius 10px, padding 40px gutter, Row space-between wrap; title Tenor Sans 24px white, sub 13px Stone max 480px, Outline button restyled white-on-dark. COPY IN PARTNERSHIP WITH OAÓN EVENTS Every package is offered through our sister company, Oaón Events: a team that has spent a decade turning rooms into moments. Hire strip: Your suite is included in the package. Every package below starts with "choose a venue": the suite hire is built in, not charged on top... Standard hire is four hours. Button: Enquire for Pricing.
Package grid LINEN	BUILD Package grid template, full variant: header label + H2 + note, all four packages, footnote. COPY DÉCOR PACKAGES Four packages. Every occasion. Every package includes your choice of suite: venue hire is built into the package, not charged on top. Footnote: STA : subject to availability.
More on request WHITE	BUILD Single column, max-width 640px: label, H2, 16px Stone body, Accent button. COPY BEYOND THE FOUR And more packages on request. These four cover most of what we host, but they aren't the whole list... Button: Request a Custom Package → /contact.
	BUILD

Suites at a glance + add-ons

LINEN

Section header, then 3 / 1 grid of glance cards: bg White, 1px Divider, radius 8px, padding 28px; name Tenor Sans 17px, type label, hairline, capacity in Tenor Sans 22px with "guests" as a label, 13px desc. Below (80px): the add-ons panel. On the live site it is Linen inside a Linen section, so its edge is invisible and it reads as plain content; keep that, or use White if you want a visible card. Radius 10px, padding 48px; 3 / 2 / 1 list with Accent dots and Divider rules; 13px note.

COPY

THE SUITES

Pair your package with a suite.

Add-ons: OPTIONAL ADD-ONS — **Everything else you might need.** Premium furniture hire · Décor hire · Event electronics · Customised party setups · Harvest tables · Additional hours (STA). Note: Additional charges apply to add-ons.

Gallery </gallery>

~100 photos in <public/images/gallery/> with WebP derivatives already generated; upload the WebPs. Filters by suite plus an Events & Décor set.

Contact

/contact

The full enquiry form. Left column is a set of "aside blocks"; right column is the form inside a linen card. FAQ below.

Page hero PALE GRADIENT	BUILD Page Hero template. COPY BEGIN THE INQUIRY Tell us about your moment.
Aside + form WHITE	BUILD Two columns 1fr 1.5fr, gap 112px, align start. Left: three aside blocks each with a label title. (1) "Get in touch": four Icon List rows with 20px 0.75px-stroke line icons in Accent — Address, Email, Response time, Time slots — then a WhatsApp option card (green 44px icon circle, "Chat on WhatsApp" + "Often the quickest way to reach us"). (2) "Available Suites": three compact rows. (3) "Location": Google Maps embed, radius 8px. Right: container bg Linen, radius 12px, padding 56px; H2 Tenor Sans "Begin the Inquiry", sub in Stone, then the Form with white fields. COPY Address: 978 Veda Ave, Montana AH, Pretoria, 0186 · Email: info@venueoan.co.za · Response: Within 24 hours · Slots: 08:00–12:00 · 13:00–17:00 · 18:00–22:00 · Sun closes 15:00. Form fields: Your Name · Email Address · Contact Number · Type of Event (Baby Shower, Kitchen Tea, Bridal Shower, Birthday, Other) · Suite Preference (Myrrh, Olive, Garden, Myrrh + Garden, Not sure) · Preferred Date · Estimated Guest Count · Package Interest (Package 1–4, Suite hire only, Not sure yet) · Tell us about your event (textarea, full width). Submit: Send Inquiry. Success: "Thank you: we'll be in touch. We aim to respond within 24 hours." Error: "Something went wrong. Please try again or message us on WhatsApp."
FAQ LINEN · MAX 680PX	BUILD Section header, then Accordion widget max-width 680px: no background, 1px Divider rules between items and above the first, question in Tenor Sans 16px with 20px vertical padding, a thin "+" icon on the right that rotates 45° when open, answer 13px Stone. Only one open at a time. COPY FAQ Questions we hear often. Twelve questions, from "How do I get pricing?" to "Is there parking?" — full text in contact.astro (the <code>faq</code> array).

Legal pages (/privacy-policy, /terms-of-service): Page Hero + a single prose column max-width 720px, H2s in Tenor Sans 24px, body 15px Stone Text, 1px Divider rules between sections. Set both to noindex. **404:** Page Hero with "Page not found" and an Accent button home.

Custom CSS

Paste into Site Settings → Custom CSS (Elementor Pro). It covers the few things the UI can't set: the scroll shadow on the header, the thin hamburger, the en-dash list bullets, the ghost word on the partner strip, the WhatsApp pulse, and the hairline focus ring. Add the named classes via Advanced → CSS Classes on the matching element.

```
/* Venue Oaón – Elementor globals */
:root{
  --oa-accent:#8B6448; --oa-charcoal:#1A1A1A; --oa-stone:#8C8578;
  --oa-linen:#F5F2EE; --oa-divider:#E0DDD8;
}
html{ scroll-behavior:smooth; }
body{ -webkit-font-smoothing:antialiased; }

/* Header: fixed bar gets a soft shadow once the page has scrolled */
.site-header{ transition:box-shadow .3s ease; }
.site-header.scrolled{ box-shadow:0 2px 24px rgba(0,0,0,.06); }

/* Hamburger: three 1px bars, 20px wide, 5px apart */
.site-header .elementor-menu-toggle{ width:44px; height:44px; }
.site-header .elementor-menu-toggle i{ font-size:0; width:20px; height:1px;
  background:var(--oa-charcoal); box-shadow:0 -6px 0 var(--oa-charcoal),0 6px 0 var(--oa-charcoal); }

/* Nav pointer as a 1px hairline that grows from the left */
.site-header .elementor-nav-menu--main .elementor-item::after{
  height:1px !important; background:var(--oa-charcoal) !important; }

/* Package + partner lists: en-dash bullets in Divider colour */
.oa-dash-list li{ list-style:none; display:flex; gap:.625rem; }
.oa-dash-list li::before{ content:"-"; color:var(--oa-divider); flex-shrink:0; }
.oa-featured .oa-dash-list li::before{ color:rgba(255,255,255,.2); }

/* Partner strip ghost word (Heading widget with class oa-ghost) */

@media (prefers-reduced-motion:reduce){ *{ animation:none !important; transition:none !important;

```

For the header `scrolled` class, add this one-liner in an HTML widget in the footer template (or a code-snippets plugin):

```

<script>
addEventListener('scroll',()=>{document.querySelector('.site-header')
  ?.classList.toggle('scrolled',scrollY>10)},{passive:true});
</script>

```

Plugins, forms & SEO

The Astro site is static and ships zero tracking by default. Keep the WordPress build equally lean: every plugin below has a reason.

Plugins

- **Elementor + Elementor Pro** — Theme Builder, Form, Gallery, Popup, Custom CSS.
- **Hello Elementor** theme — blank canvas, no theme CSS to fight.
- **Rank Math or Yoast** — titles, descriptions, OG image, sitemap, LocalBusiness schema.

- **Redirection** — keep the trailing-slash URLs (/about/, /packages/, /gallery/, /contact/) 1:1; the old site's sitemap is already indexed.
- **Image optimisation** (ShortPixel, Imagify or similar) — or upload the WebPs from the repo directly and skip it.
- **Click to Chat** (optional) — if you'd rather not build the WhatsApp popup by hand.
- **Cookie notice** — only needed if you add analytics. The live site shows a notice only when GA is on.

Forms

- Three forms: enquiry band (Home, 4 fields), full enquiry (Contact, 9 fields), WhatsApp sheet (composes a wa.me message, sends nothing to a server).
- Elementor Pro Form → *Email* to info@venueoan.co.za, subject "New Enquiry: Venue Oaón". Add a honeypot field (the site uses one named `botcheck`)
- Alternative: `https://api.web3forms.com/submit` with a hidden `access_key`; the key in the repo's `src/config.ts` is public by design and domain-allowlisted, so add the new domain in the Web3Form's dashboard.
- Install an SMTP plugin (WP Mail SMTP) so form emails actually arrive.

SEO & assets to carry over

- `og-image.jpg` (1200×630), favicons (16, 32, 180 apple-touch), `site.webmanifest`, theme-colour #8B6448.
- Page titles and descriptions are in each `src/pages/*.astro` frontmatter; copy them verbatim.
- JSON-LD from `index.astro` (LocalBusiness + EventVenue with geo -25.663333, 28.259444, opening hours, suites as offers) and `about.astro` (Organization). Paste into the SEO plugin's custom schema or an HTML widget in the head.
- Language `en-ZA`, hreflang en-ZA + x-default, canonical per page, legal pages noindex.

Pre-launch checklist

- ☐ Global colours and fonts entered; Elementor default colours/fonts disabled.
- ☐ Tenor Sans is never bold; Inter never above 500.
- ☐ Every section alternates white / linen exactly as blueprinted; the dark ladder (Charcoal strip → Espresso band → #121212 footer) is intact.
- ☐ All buttons 48px tall, 2px radius, uppercase 10px letter-spaced.
- ☐ Header fixed at 100 / 80 / 68px and every page's first section clears it.

- ☐ Entrance animations are Fade In Up only, staggered, and off under reduced motion.
- ☐ Forms send an email and show the success panel; WhatsApp launcher opens with +27 76 182 3532 prefilled.
- ☐ Gallery filters work and the lightbox opens; images are WebP.
- ☐ Titles, descriptions, OG image, favicons, schema, redirects, sitemap submitted.
- ☐ Mobile pass at 390px: hero panel, 2×2 stats, stacked columns, full-width buttons.
